

REMINDER: Dental Visits at Our School

School Name

Date of Visit

All Smiles Community Oral Health will be providing two services:

Dental Screening

Dental professionals will look inside the children's mouths and check the overall health of their teeth.

Fluoride Varnish

Dental professionals will brush fluoride onto the children's teeth.

How you can help your students be ready:

- Ensure students are in the classroom when the dental hygienist arrives.
- Make sure each child who is signed up for services has a name tag.
- Brushed teeth make better dental screenings. Serious issues can get overlooked if a child's teeth aren't brushed after meals or snacks.
